Swarm Day

A very impressive Stake Swarm Day was conducted by Barbara McPhee, Taylor Stake Guardian leader, on Friday, May 26, at the Stake House.

Mary Snow played the processional music while the three ranks of Bee Hive Girls, uniformed in black skirts, white blouses and their Bee Hive bands, took their places of honor.

The invocation was offered by Doreen Chipman of the Welling Ward.

Mrs. Frank Taylor, Stake Y.W.M.I.A. President, gave the welcoming address after which the girls sang a Bee Hive song.

The following girls represented their classes and each was crowned queen by Mrs. Taylor and was presented with a rose corsage and the book, "The Heart of a Rose":

Yvonne Meeks	Marie Nalder
Elaine Larson	Myrna Barton
Janice Hedenstrom	Ginger Evans
Jeanette Foote	Shirley Hogenson
Mararet Jacobs	Maurine Brown
Sheila Sabey	Mary Winkler

The queens took their places of honor on their thrones where they reigned over the remainder of the evenings entertainment.

Eighty-three girls were graduated from the Bee Hive ranks and were welcomed into the Mia Mads group by Bertha Stone. Of these, 76 were honor Bees and were presented with roses by Barbara McPhee and Jolayne Hill.

Twenty-seven Seagull Girls were welcomed into the Builder group by Edna Starkor.

In honor of long service Ada Stone and Victoria Zaugg will receive pins for teaching three consecutive years and Flourelle Palmer and Hilda Larson will receive pins for teaching for five consecutive years.

The following program was presented by the Bee Hive Girls.

Chorus - Raymond Third Ward
Skit - Stirling Ward
Chorus - Magrath
Vocal Duet - Karma Woolley and Patricia Strong

The audience, which numbered 365, then inspected the Hobby Corner, which was made up of exhibits by contestants for the crowns.

Quebec City is Canada's oldest city.

Mrs. Percy Cope has been a patient in the local hospital for the past week suffering from a severe attack of pneumonia.

Home and School

The Home and School Association met on Wednesday, May 31, in the Public School to hear a very interesting talk, "Teaching Children to Read".

Mrs. Wing, who gave the talk, demonstrated how the children's attention is caught by acting out the stories in their readers. She showed how the exercises in the work books tie in with the reading. She told us that at the end of the first year the children have read at least twelve books, more if classes are not interrupted by sickness as they were this year.

School was made to sound so attractive that several people said they were almost sorry that they would not be starting in Grade 1 this fall.

The meeting was closed by electing the following officers for the next year:

President - Mrs. Dorothy Dahl
Vice-President - Mrs. Delecta Somersfeldt
Secretary - Mrs. Mary D. Hyde
Treasurer - Mrs. Lucille Paxman

Mrs. Dahl asked us all to note that the last Wednesday in each month is Home and School night and to bring this to the attention of all organizations that might be planning to hold other entertainment on this night.

It was decided to hold all future meetings in the Public School.

THANKS

As President of the Rotary Club of Raymond, I wish to thank the people of the community for their wonderful response to the call for donations to the Manitoba Flood Relief Fund. Many thanks also go to those who assisted in the collection. Raymond has made a fine contribution to this work with approximately \$1,200 being donated.

(Signed) S. B. Card.

OPEN LETTER TO RAYMOND

To the People of Raymond,

We, as Mayor and Council, wish to take this opportunity to express our thanks and appreciation for the splendid way you responded to the campaign launched by our service clubs.

Your kindness and generosity have done much in helping the flood stricken people of Manitoba and every contribution, large or small, is greatly appreciated.

YWMIA Summer Home

We, as the Stake Y.W.M.I.A. Board wish to most sincerely thank all those who have helped to give us this fine start toward building our Girls Home.

Those who have already contributed are:

Raymond Second Ward Y.W.M.I.A.
Raymond Fourth Ward Y.W.M.I.A.
Raymond and St. Mary's Builders Association
Mr. and Mrs. C. R. Wing

Bishop and Mrs. Golden Snow
W. C. Stone
Doral Stone
Rol Stone
Mac's Service Station (John McPhee)
Graham Motors
Raymond Mercantile
Burns' Shoe Store
The Pharmacy
Raymond Cleaners

Fromm Jewellery
Mr. and Mrs. H. Smith, Coutts
Mr. and Mrs. I. B. Roberts
The Taylor Stake Y.W.M.I.A. Board

Total contributions, so far, amount to \$1,293.31.

The reason some names are not listed here, although contributions were made, is that the lump sum was given to the Stake Board by various organizations and the list of names was not included. Many thanks also go to these people.

People wishing to make donations to this very worthy cause may still do so by handing their money to any member of the Stake Board of the Y.W.M.I.A.

Mr. and Mrs. Harris and two sons of Ririe, Idaho, were recent visitors here, the guests of Mr. and Mrs. Ray Dewey.

One of the Harris boys was Kay Cook's first missionary companion in Australia.

Mrs. June Allred returned on Thursday after spending five days in Banff attending the "Blueprint for Action" school dealing with cancer. This school is sponsored by the Provincial Women's Institute.

Next week we will have an article on this cancer school so watch for it.

Very Important Notice

It is requested that parents having children starting school at the fall term have them registered immediately at the Public School office. The complete enrollment should be in by June 15, 1950. This should be done so that a new room may be provided if necessary.

All pupils registered must be six years of age on, or before, September 1, 1950. Please present birth certificate or certificate of blessing at the time of registering.

Raymond School Board

C. R. Wing - President
Raymond Rotary 1950-51

ROTE SPOKES

Monday, May 29, Legion Hall—Under this date line we shall proceed with our column. With Stewart Card presiding a nice turn-out of Rotarians met in weekly meeting. The most important news to come out of the meeting was President Stewart's announcement of executive officers who will guide the destinies of our club for the next Rotary year.

C. R. Wing has accepted the Presidency. L. A. Wood will serve as Vice-President and Howard Melchin will take over the duties of Secretary-Treasurer.

"C.R.", as he is known to Rotarians, is a Charter Member of the Raymond Club. He has been an active member since the club's inception as a Rotary Outpost "way back when". During the years he has "Chairmanned" various committees and put in a year as Secretary-Treasurer. His activity reached its greatest heights when the Rotarians built the swimming pool. He acted as Construction Boss and since then the pool has been one of his "babies". Until this time, because of his duties at the Sugar Factory, he has not felt able to devote the time to Rotary required of a President. Under C.R.'s leadership we fellow Rotarians are looking forward to a banner year.

At this same meeting the Club organized for its part in the drive to raise money for the Manitoba Flood Relief Fund. The club executive is proud of the way all Rotarians pitched in and did their job. The entire town east of Broadway was canvassed by our club on Monday night. They met with enthusiastic response and the townspeople deserve a word of praise for their generosity. At date of writing the results of the canvass are not available but we will try to incorporate this information in our next column.

What Has Rotary Done?

Under this heading we are passing on a report taken from the "Rotary Whizz" of Winnipeg.

"We get so used to seeing each other Wednesday, that it is just like being married, and we don't realize how much we miss Rotary and our weekly meeting until the suddenly cease to exist. Several Rotarians, meeting here and there, have made the statement that it seems like a long, long time since we last got together. We will soon have our regular luncheons again, so be of good cheer.

Since the opportunity has not been afforded at weekly meeting to report details, we feel our members should know what Rotary has been doing during this National Emergency right here in our home town. We know without being told that every Rotarian has been doing something, large or small, to help, but you want a report on your club's effort.

When trouble first started to mount and before the Red Cross and Federal Government were organized to take control, there was a terrific need for sandwiches, coffee, chocolate bars, chewing gum, cigarettes, etc. for the dike workers. We asked Harry Inman to take over and organize some help with Rotary funds, and this he did, quickly and efficiently.

We held an emergency meeting of the Board on Monday, May 8th, and sent out a circular letter to our members asking if they needed housing or could offer some. There was a splendid response and we placed some of our members. We also found that our members were away ahead of us, and had already started to take in evacuated families. It might be of interest to report here that several nearby clubs also offered accommodation, and

(Continued on page 2)

Story Hour

A very interesting and entertaining Story Hour was presented to the Mutuals of the four wards on Thursday evening in the Stake House. Mrs. Margaret Taylor, Activity Counsellor in the Fourth Ward, conducted the program.

Each story was introduced by an appropriate musical selection. Hazel Fairbanks started the evening off with a gay organ solo entitled "The Wedding of the Painted Doll", introducing Mrs. Virginia Rolston's humorous story, "The Waltz". Eddie Kiddie played the violin background music for a very touching story told by Mrs. Louis Brandley, "Come, Come Ye Saints", sung by the congregation, was followed by a story of the courage of a young boy in the Frontier Days told by Mrs. F. Walker. Geraldine Court set the mood for Mrs. Emma Redd's love story by singing a lilting folk tune called, "When Love is Kind". Mrs. Melba Mehew's humorous reading about "lazy, good for nothin' Ephraim Jones" was accompanied by Mrs. Emma Dahl at the piano.

Beth Walker played the Prelude and Postlude music.

FIRES

The Volunteer Fire Brigade, or possibly we should call it the Lightning Brigade, is to be highly commended for their splendid performance on Tuesday afternoon when they were called to extinguish a fire 5½ blocks west of Broadway. In the unbelievably short time of 40 seconds after the call was sounded the water wagon was on its way to the home of Carl Lutz and in 2½ minutes 5 of the volunteers were fighting the blaze that destroyed a barn on the windward side of the Lutz house. The prompt action of the department very likely saved the house from being burned.

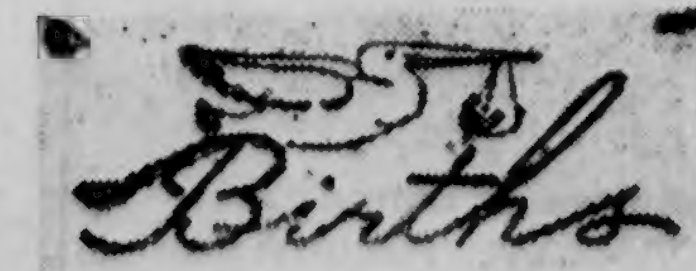

Damage was estimated at \$300.

Another alarm was sounded on Thursday afternoon calling the department to the scene of a bonfire at the same location a barn was burned a few weeks ago in the northeast part of town. Just some kids having fun.

LITTLE CHANGE ANTICIPATED IN HOUSE PRICES

The majority of those answering The Financial Post's question regarding changes in the level of house prices anticipate very little movement in the next 12 months.

Opinion does vary somewhat in the different sections of the country, depending on crop conditions in the west, the Winnipeg flood, and the cost of labor and freight but generally speaking respondents think things will remain fairly stable.

One answer, from Gordon E. Konantz, president of the North American Lumber and Supply Co. in Winnipeg, took special cognizance of the flood condition. He believes house values in danger areas will be reduced tremendously until flood control is assured, while the values of safe areas will remain at present levels or even increase due to insistent demand.

ROTE SPOKES

(Continued from page 1)

a member of the Rotary Club in the city of Minneapolis telephoned offering housing.

We organized appeals to other clubs in our district for immediate necessities — flashlights, blankets, clothing, cots and mattresses. What a truly wonderful response. We were in a new kind of flood having nothing to do with water, and we were hard hit to find storage space until it could be distributed.

At the suggestion of Hall Popham, Chairman of the Canadian Advisory Committee, we organized an appeal for financial contributions through all Rotary Clubs in Canada. This is now tied in with the general appeal undertaken by the Province and the City of Winnipeg, but the money is coming in daily and while these figures will be out-of-date when you read them, we would say that \$1,289.00 has come to hand, and in some cases hundreds of dollars from very small clubs with only a handful of members. We have heard from other Rotary Clubs who in turn have given thousands of dollars through their own various organizations or flood relief funds that have been set up throughout the country. We dare not name any one club, it wouldn't be fair, but some of them have been generous beyond belief.

Telegrams and long distance telephone calls have literally poured in. They are too numerous to mention except to say that they have come from near and far, and when we say far we mean France, Wales, London and Harrow, England. The offers from our sister clubs in the United States have been almost as many in number as from Canadian Clubs. It has been quite an experience fellows, to see how they rally round, when you need them.

This report has been sketchy, we know we have left out a good deal. We have hesitated to mention names because we know so many are doing a grand work of service — some day the full story may be told, but it is likely that it will come to us in bits and pieces with the passing of time.

Groups of members organized to distribute food to evacuees going out on trains. Others responded to calls for assistance from flooded-out victims and helped them evacuate. Lots of our members worked on the dikes and are still taking their turn. Everywhere we turn we find members and their wives working on some aspect of the crisis. We have tied our efforts in closely with the Red Cross, now that they are organized and have charge, this is to prevent duplication and to take advantage of their planned set-up.

Rotarians — be proud you belong to Rotary, and be proud of every Rotary Club throughout the world. What a wonderful bunch of fellows they really are. Their hearts are as big as all outdoors. Here in Winnipeg, during the last few weeks a real opportunity for service was presented. We feel that Rotary was not found wanting."

A Good Reminder

For you Rotarian businessmen or for that matter any business man, here is an old story but a good reminder.

There was once a man who lived by the side of the road and sold hot dogs. He was hard of hearing so he had no radio. He had trouble with his eyes so he read no newspapers. But he sold good hot dogs.

He put signs up on the road telling how good they were . . . he stood at the side of the road and cried, "buy a hot dog mister?" and people bought. He increased his meat and bun orders. He bought a bigger stove to take care of his trade. But then something happened.

His son said, "Father, haven't you you been listening to the radio? Haven't you been reading the newspapers? There's a big depression on. The European situation is terrible. The domestic situation is worse. Everything is going to pot." Whereupon the father thought, "Well, my son's been to college, he reads the newspapers and he listens to the radio and he ought to know."

So the father cut down on his meat and bun orders, took down his advertising signs and no longer bothered to stand out on the highway to sell his hot dogs.

And his hot dog sales fell almost over-night. "You are right, son," the father said to the boy. "We certainly are in the middle of a great depression."

Until next week this is your Rote Reporter who humbly suggests that to offer a helping hand once was a pleasant vocation until everything was organized, the politicians became alerted, and the hands asking for help grew to millions.

Stirling News

(Mrs. Lief Erickson)

Douglas Christensen returned last week from Logan, Utah, where, for the past winter, he has been a student at the Agricultural College.

Mr. and Mrs. A. W. Proctor have as their guests Dr. and Mrs. Fred N. Spackman and children of Edmonton, Mr. and Mrs. Donald Proctor of Los Angeles and Mr. and Mrs. Melvin Seely from Lundbreck.

The closing Relief Society social was held on Tuesday afternoon in the Community Hall. A variety program was presented and a lunch served.

A collection of hand work and hobbies was displayed showing the varied interests and abilities of the Relief Society members.

During the afternoon Mrs. Ruth Peterson and Margaret Zaugg were sustained as councillors to President Eudora Oler.

At the recent Swarm Day exercises held in Raymond, Myrna Barton and Shirley Hogensen were crowned as queens of their respective classes from this ward.

On Sunday afternoon Margaret Young entertained a group of mothers and their young "hopefuls" at a birthday party honoring her three year old daughter, Susan. A pretty birthday cake and lunch highlighted the afternoon. The honored guest received many pretty gifts from her young friends.

Special speakers at the Sunday evening service were Dennis Fletcher of the Stake High Council and Elders Hamilton and Miller, all of Magrath. Their talks, testimonials and faith promoting incidents were very timely and thoroughly enjoyed.

Musical numbers were given by the ward choir.

The Stake Primary Board held an outstanding Leadership and Union Meeting here recently where they demonstrated, in detail, the summer primary program to the teachers and officers of the many wards throughout the Stake. The Board members were untiring in their efforts, which entailed weeks of planning and work, to put this program into effect.

The result was very pleasing however, as the customs, costumes, songs, dances, handicraft and religious rituals were presented in a very colorful manner.

The people to be studied this year are the people of the British Isles, including England, Ireland, Scotland and Wales, the people of the Isles of the Pacific and the Indians.

Unlimited material was given including miniature floats, dances and songs. A special number was a song by a group of boys in the Samoan language. All this should be the means of putting a great deal of enthusiasm and color into the ward primaries and the Stake Board members should feel a great deal of satisfaction over the efforts put forth.

A large crowd attended with representations from every ward in the Stake.

The Rural Electrification program in the district is soon to become a reality. Twenty of the intended eighty miles of line are completed with most of the material for the remainder on hand. Almost all the farmers are taking advantage of the scheme and are very happy about the whole thing.

AMERICAN RED CROSS GIFT will be a great stimulus to the people of Manitoba and Canada in this time of distress.

The donation from American Red Cross arrived as Canadian Red Cross officials here were taking stock of the tremendous job of emergency relief to flood victims still facing them.

During the past few weeks, Red Cross has provided emergency shelter, food, clothing and medical care for almost 20,000 persons and has directly evacuated 5,500 flood victims. Until the return to normal, the tremendous job of emergency relief will have to be continued.

The offer was accepted by John A. MacAulay, chairman, Central Council, Canadian Red Cross, who gave assurance that 'this magnificent gift

Experimental Farm Letter

SUMMERFALLOWING WITH THE BLADE CULTIVATOR

The season for summerfallowing is here and for the first cultivation farmers will be choosing the implement that will do the best job. The main reason for fallowing in dry areas is to store moisture for the 1951 crop. When rain falls it saturates the surface soil and the surplus moisture enters the lower soil layer. It is this deeper moisture that is important and it can only be removed by growing plants. Therefore to store the maximum moisture it is necessary that weed growth be kept at a minimum during the fallow season. At the same time the prevention of soil drifting must be kept in mind. An adequate trash cover has proven to be the most effective protection against damaging winds. Therefore the fallow procedure should aim to prevent weed growth and leave the surface covered with stubble and dead weeds.

Blade cultivators have come into common use in Southern Alberta because they kill weeds and at the same time leave the stubble on the surface. The blade cultivator is used extensively for fallowing at the Experimental Station. Every effort is made to use it at as shallow a depth as possible because the weed kill is more effective than when it is operated at greater depths than three inches. No increase in yield has been obtained from deeper cultivated fallow as compared with shallow cultivated fallows. Some farmers insist that deep cultivation is necessary to break up the "hard pan" layer. This is not a hard pan layer but a shallow compact layer formed by the pressure of the farm machinery passing over the field. This layer does not to any appreciable extent resist the penetration of moisture.

Deep cultivation may be desirable in a limited number of cases including solonchaks or alkali soils but for normal soils fallowing is done more effectively and economically at a shallow depth.

Weight must be used to make the blade cultivator work at a shallow, uniform depth. Under most soil conditions 100 to 150 pounds per foot of width will give satisfactory results.

Reduction of weed growth has been most effectively done by burning as soon as possible after a storm rather than waiting for good weed killing weather.

The use of a blade may require an extra cultivation as compared with using a one-way disk. However several strokes can be made with the blade without the risk of losing trash cover protection. In most cases two strokes of the one-way disk will reduce the trash cover to the danger point.

Blade cultivators are being used more extensively each year. They are highly suitable for summerfallowing under dry farming conditions but, as with other implements, the farmer must learn to use them properly.

—The Lethbridge Herald

Dahl Brothers are the dealers for the Noble Blade and will be pleased, upon request to demonstrate this machine in your own field.

HE AND SHE

It's a man's world all right. Just look at the difference in these descriptive words and phrases.

If a man doesn't marry, he's a bachelor — glamorous word. If a woman doesn't marry, she's an old maid. When it's his night out, he's out with the boys. When it's her night out, she's at a hen party. What he hears at the office is news. What she hears at a bridge party is gossip.

If he runs the family, he is head of the house. If she runs it, she wears the pants in that family. If he is overly solicitous of her, he is a devoted husband. If she is overly solicitous of him, he is hen-pecked. If he keeps his eye on her at a party, he is an attentive husband. If she sticks close to him, she is a possessive wife.

In middle age he is in the prime of life, while at the same age she is no spring chicken. If he is an easy spender, he does not deny his family anything. If she doesn't count the pennies, she is extravagant or a poor manager. Grey hair gives him a distinguished look. If she has it, she's an old hag. If he hasn't any small talk, he's the quiet type. If she hasn't any, she's mousy.

But it all depends on one thing — whether you're speaking of a man or a woman.

HOUSEWIVES BEWARE!

DO NOT BE MISLED BY STATEMENTS PRESENTLY BEING MADE THAT ALUMINUM COOKING UTENSILS ARE HARMFUL TO HEALTH.

Facts About Aluminum

"We know of no danger to foods cooked in aluminum cooking utensils, and we believe that propaganda against aluminum comes from quacks, cranks and fadists."

—The American Medical Journal.

"It has been proved over and over again that there is no harm in aluminum and that its use for cooking utensils is entirely safe."

—Mayo Clinic.

"Next to gold and platinum, aluminum is the best metal for food vessels—even better than silver."

—The British Medical Journal.

CLOTHES WASHED BY SOUND WAVES

Threatening to steal the show when Canada's third International Trade Fair opens in Toronto May 29 is a radically new washing machine from Australia, reports The Financial Post. The machine, making use of ultrasonic waves, dispenses with soap or other cleaning agent, is claimed to do a 14 lb. wash in 15 minutes or less, and it could be produced in Canada to sell here for \$10! The Australian made model could be imported to sell in Canada for \$55.

Outwardly the revolutionary washing machine looks like a standard washer, but there are no moving parts inside. The washing is accomplished by vibrations transmitted through the clear water from a small box with a patented air-lock, The Post reports.

The export manager of a Toronto appliance firm says he used one of these machines when he was in Australia recently, and their cost of operation is fantastically cheap — one Australian penny (2½¢) per 100 hours.

Once upon a time an enterprising poultryman crossed his hens with parrots, to save time. He used to spend much time time hunting the eggs, but now the hens walk up to him and say, "Hank, I just laid an egg. Go get it."

A grocer was on the point of going bankrupt when a man to whom he owed a lot of money came into the store. "Look," said the man, "I don't want any excuses. I want my money and no fooling."

"Listen," said the grocer, "I'm making you a preferred creditor before I go bankrupt."

"What do you mean, a preferred creditor?" asked the man.

"Well," said the grocer, "I'm telling you now that you ain't going to get your money. All the other creditors won't know until next week."

For that diamond ring see Gordon Stone, Jeweler. Term are available.

RECORD SETTLEMENT OF RIMOUSKI FIRE LOSSES

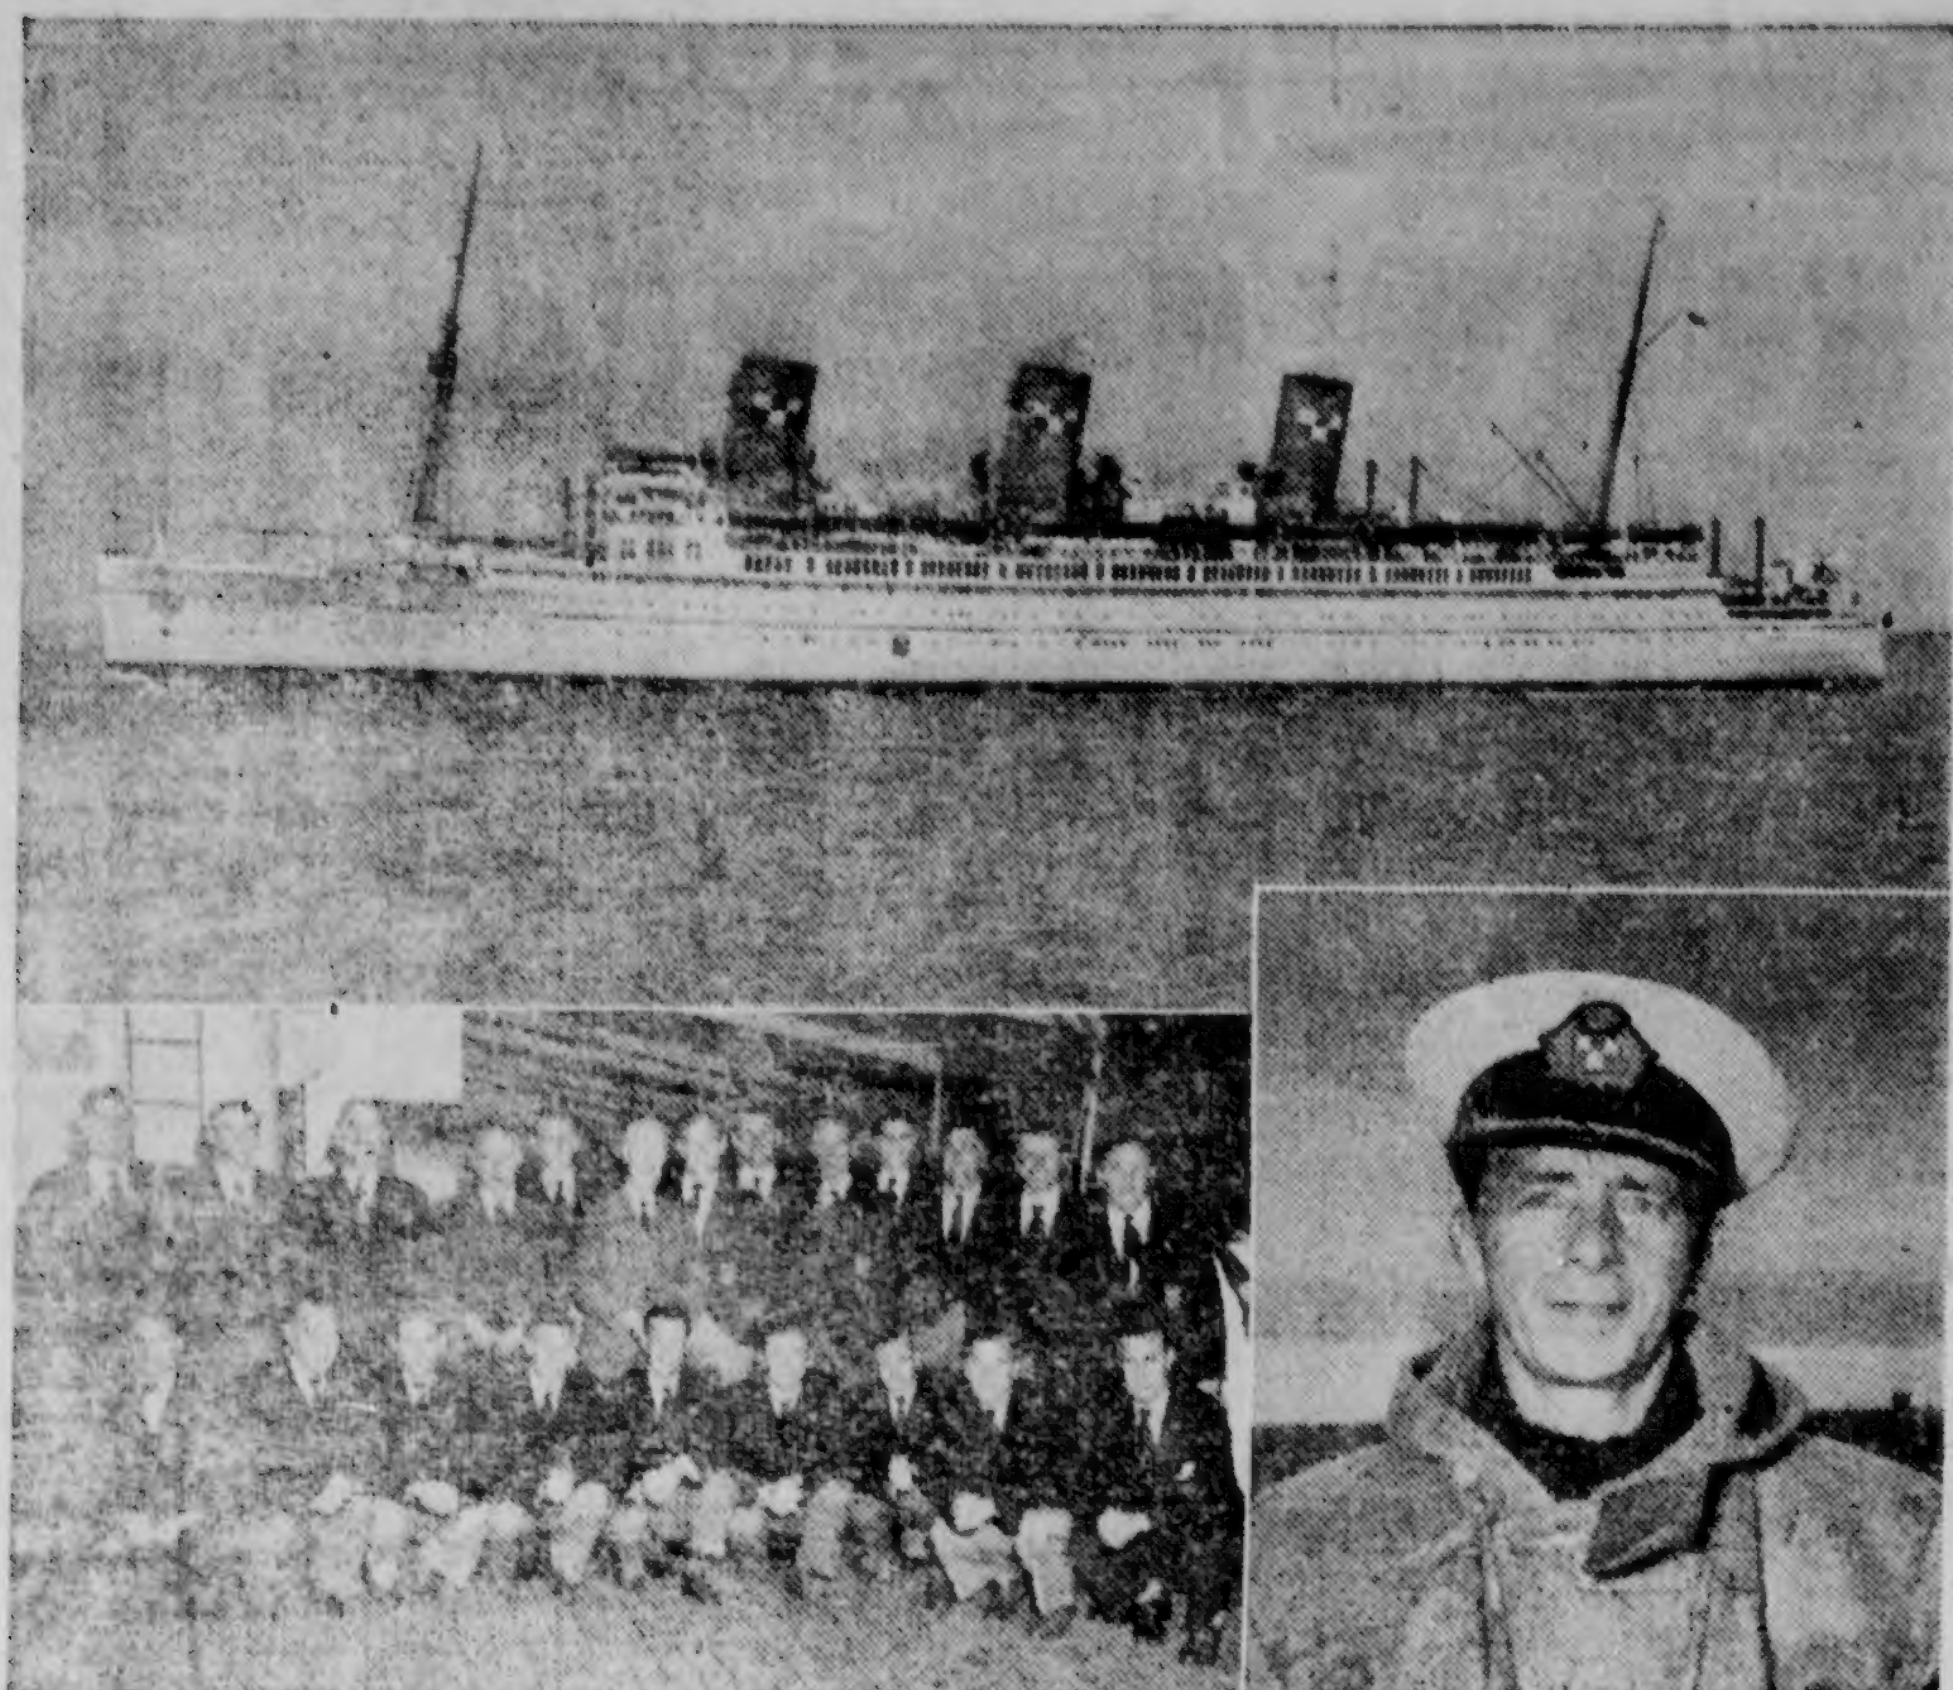

Something of a record for settling insurance claims arising out of the Rimouski fire is reported by The Financial Post. Following an emergency plan formulated by fire insurance companies during the war, most indemnity cheques to individual home owners were delivered within a week if the fire itself, and the larger losses are also being adjusted with record despatch.

Total fire loss may reach \$20 millions but insurance officials hesitate to make any estimate of the insurance loss, The Post says. Some 200 companies are involved, and while individual companies know how much they have paid and what their total liability is, it has not been possible as yet to estimate the total value of insured property destroyed. Attention has been centered on paying losses, rather than compiling statistics covering the whole situation.

Give to the Winnipeg Flood Relief

EMBRYO ANNOUNCER — Bobby Taylor, thirteen-year-old Vancouver radio and film actor, singer, pianist and saxophonist has long cherished an ambition to be a radio announcer. And because he feels that an announcer should be able to take over the controls, he often works in a little engineering practice in the control rooms at the CBC's Vancouver studios between rehearsals for drama broadcasts. Here he is in front of the turntables, complete with earphones, learning how to start a record "on cue".

RECORD BREAKER

The newly re-conditioned flagship of the Canadian Pacific's Atlantic fleet, the 26,000 ton Empress of Scotland is pictured above as she passed Father Point on the St. Lawrence River just 120 hours and 36 minutes out of Greenock, Scotland, to establish a trans-Atlantic record between those two points on her post-war maiden voyage completed last week. Plying between Liverpool, Gt. Britain and Quebec City, the three funneled speedster carried on her first voyage the All-England Football Team (lower left), which includes among its ranks such stellar performers as Stan Matthews, Britlan's "Mr. Football". The team, on a tour of Canada and the U.S. will play in Montreal, Toronto, Winnipeg, Calgary, Regina, Vancouver, Victoria and Detroit. Lower right inset shows the skipper of the "Scotland", Captain E. A. Shergold, who was largely responsible for the record passage. The "Scotland" was known in pre-war days as the Empress of Japan, largest and fastest passenger vessel on the Pacific Ocean, and just two years ago she ended a protracted war service of eight and on half years, during which time she steamed over 712,000 miles, the greatest mileage of any troopship.

Many ex-servicemen of southern Alberta, including the editor, will remember the "Scotland" as their means of transportation during the war.

performance!

"We can drive all day without tiring!"
Owner's say their new Fords have that big-car comfort. Ford's "Mid Ship" Ride cradles you between wheels where the going is smoothest. . . "Hydra Coil" front springs and "Para-Flex" rear springs level out the bumps. . . rear seat is wider than in many high-priced cars!

"We figure our operating costs are lower!"
Owners say the new Ford costs less for gas, oil and upkeep. For even greater economy, and quieter performance, Ford offers optional Overdrive—which lets the engine loaf at 35 M.P.H. while the car hustles at 50! And Overdrive pays for itself with gasoline savings of up to 15%.

THE SWING IS TO THE ONE FINE CAR IN ITS FIELD

OUTLAWING COMMUNISTS NOT
THE BEST WAY

The most effective, most desirable defense against communists in Canada is not to outlaw them. This point is resoundingly made by respondents to The Financial Post's current question of the week. Such a move, they say, is likely only to make martyrs of the Reds, rouse sympathy for them, and attract adherents to their cause.

In general, The Post sums up, reader opinion is that an effective defense lies in an aggressive campaign to expose communist falsities; by a constructive educational drive to bring home to Canadians that free enterprise democracy is best; by promoting such excellent living and working conditions as will afford no opportunity in Canada for communism to take root and grow.

Said Blanche Marshall, president of the National Council of Women: "... we would urge that Canadian organizations, government and voluntary, engaged in educational, welfare and economic activities should work more earnestly than ever to promote such good living and working conditions as will afford no opportunity in Canada for communistic propaganda to root and grow. Canadian Christian democracy must prove its superiority to any other way of life."

The total population of Canada's ten provinces at December 1, 1949, was 13,707,000.

About three quarters of Canada's school teacher are women.

Mackinaw cloth is a strictly Canadian product, designed by Canadian woollen mills for Canadian use.

In the latest year of record, 1948, there were 2,035,000 motor vehicles registered in Canada, averaging one vehicle per 6.4 persons.

We are the Agents for this Unique System of Farm Bookkeeping. The book made by a farmer for farmers to use. Farmers are well rewarded for the time spent on keeping an up-to-date set of books. Call in and see for yourself how simple Mr. A. E. Nelson of Calgary has made this chore.

Gardening

Gardening

By Gordon Lindsay Smith

An Ounce of Prevention

It's a lot easier to keep a garden before planting with some ready pre- The latter job is possible, of course, but it takes time and in the meantime one is apt to get discouraged. There is no dark secret about flourishing flowers, vegetables, grass and other things that make up a garden.

The first point that matters is clean, vigorous soil and good seed or foundation stock. When one buys seed and plants from reputable Canadian sources and does so regularly each year, there is far less danger from disease and insect pests. With certain bulky things too, like potatoes and gladioli bulbs, most experts treat before planting with some ready prepared chemical that is now on the market.

In our great grandfather's day they didn't have to worry much about diseases carried over in the soil, but that is not the case now. In the older sections of Canada, at least, there are a lot of things lurking in the soil, that only treatment of seed and fairly constant spraying or dusting of the plants can keep in control. In using any of these solutions one should remember to follow directions carefully. If these call for soaking several minutes or several hours then that is the only effective procedure. It is not necessary to treat many kinds of seed provided, of course that good stock is obtained in the first place.

Be Ready for Pests

The second bit of advice from the experts is to be ready for any attack of insects or disease before the damage gets serious.

In this preventive policy a little special equipment will prove invaluable. A good sprayer or duster and a few pounds of raw material are just as important as cultivating tools and fertilizer for the growing end of the job.

It is possible to buy the raw ingredients and mix sprays and dusts, this is often the course followed when the garden is very large. But ready-mixed sprays with only water to be added and dusts all ready for the gun are inexpensive and will save time and trouble in most cases. For the ordinary sized garden one of the small hand sprayers that hold a few quarts will probably be sufficient but for larger jobs and for lawn work with 2,4-D to kill weeds a larger piece of equipment will be necessary. In recent years many gardeners have turned to the use of dust and dusters. For a couple of dollars one can get a hand-operated gun that will cover a large garden in a few minutes.

Get Going Fast

The main thing with sprays and dusts is to have a little material ready and to start using it at the first sign of trouble. If this is done there will be less trouble coping with almost any type of bug or disease.

A point to keep in mind is that insect pests divide themselves into two types—those that bite or eat holes in the foliage and those that suck the juices. Damage from the first type is soon noticeable but the latter's work shows up only when the leaves or plants wilt. For biters and eaters use a poison and for the suckers a burning spray.

Snapshot Treasure

By Nancy Cleaver

"What lovely pictures you have of your children," Mrs. Blake said almost enviously to her neighbor, Mrs. Brown. "You must have real knack with a camera! I can't get Jimmie to stay still long enough to get a snap of him. The few pictures John and I have taken of him have been a waste of money."

"I've had my picture failures too," Mrs. Brown said quickly, "but my husband and I both wanted a picture record of our youngsters from their earliest years, so we made a hobby of finding out some rules for amateur photographers and some secrets about taking pictures of children."

Any parent who wants to take snaps of his child but hesitates because he feels so green at picture taking should invest in a helpful, simple handbook such as Canadian Kodak Company's "How to Make Good Pictures." A public library usually has several books and magazines on photography too. The basic rules for picture taking are:

Keep your camera perfectly still when you click the shutter.

Be the right distance from the object you are taking.

Do not "shoot" into the sun—have the sun behind you.

Keep your lens clean and your fingers away from it.

Turn your film to the next number immediately after taking a picture.

Watch your background! Do not let it compete with the objects you are taking. A figure in light clothes against a dark background is a good plan.

Use your imagination to avoid mistakes—a tree branch sticking out of a person's head looks ridiculous. So does a "feet first" shot where the laws of perspective have been forgotten—the soles of the shoes appear enormous compared to the size of the rest of the body.

These and other mechanical details can be quickly mastered. One of the most valuable things for an amateur photographer to do is to discover why some of his snapshots are so poor. Ask a friend who is experienced in photography or even the man who develops your films, what was the reason for a blurred or unsatisfactory picture and then don't make the same mistake again!

Children are born actors. They lend themselves to informal action shots. Don't take stiff, unnatural pictures of a child and his chums standing at attention in a straight line, staring at the camera. Always have your camera loaded, ready for an unexpected shot.

Pictures, taken at any season of the year which tell a story of happy days, give pleasure to all who see them. They are priceless treasures to parents in years to come. How grand-children and fond relatives love snapshots slipped into a letter. What joy a picture can give! The investment in a camera and film, the time and study and patience necessary to master the art of taking are small indeed compared to the pleasure snapshots can give now and in the years to come.

Approximately 15,000,000 gallons of water are used every day in the manufacture of nylon at a Kingston, Ont. plant.

Did you see the new 1950 model General Electric Vacuum Cleaner at E. S. Heninger Stores? The price is only \$49.50.

Here is the list of contributors to the Manitoba Flood Relief Fund. If any names are mis-spelled or omitted we apologize. Some people have made their donation at the banks and so their names do not appear here. Their kindness is appreciated nevertheless. Any one desirous of making a contribution or adding to the one already made can still do so. Almost any Lion or Rotarian as well as the Coal Office of S. B. Card will be glad to take your money.

L.D.S. Girls Honor Roll

Below are listed the names of the 49 girls of the Taylor Stake who, under the L.D.S. Girls Program, have qualified as 100% girls for the year 1949. This means that they have attended all church services and have lived up to the L.D.S. standards. Some of the girls have completed two or three years with two girls having a perfect attendance for four years. Out of the 312 girls in the Stake included in this program 226 received individual awards. Congratulations girls!

Wildcats are risky

To an oil man a "wildcat" is a well drilled in an area where oil has never been found. Drilling a wildcat is a risky undertaking and a costly one. Some wells have cost more than a million dollars—and have not been successful.

For that reason oil men make as certain as they can, before drilling, that there is a good chance of finding oil. They use the most modern instruments and skills to locate each drilling site; but still the odds are 20 to one against them. Only about one wildcat in 20 becomes a producer.

Over the past 30 years oil men have worked continuously against these odds. In western Canada Imperial alone drilled 134 wells—all dry—before the Leduc field was discovered in 1947.

But the end result has been new oil for Canada and benefits for Canadians. There are thousands of new jobs. Millions of U.S. dollars are being saved as the need for imported oil lessens. And, as another natural resource moves towards full development, the Canadian standard of living climbs higher.

These are real benefits to Canadians and they will increase as more oil is found. But to find more oil and to spread the advantages it brings, oil men must continue to work against long odds.

Sometimes a job that must be done can't be done without great risks.

Bringing you oil is a big job

...and a costly one

Propane is becoming a magic word for the rural housewife, reports The Financial Post. It's rendering the old box stove obsolete and introducing the kitchen moderne to the country. The clean-burning, high powered petroleum gas packaged in liquid form in tall metal cylinders is taking a lot of the drudgery out of rural cooking. It is helping to bring back some of the spirit of vacation to the harried housewife transplanted to the summer cottage.

Up to this year most of the propane has been imported from the U.S.—from 3.7 million gallons in 1942 this has risen to an estimated 65 million gallons in 1948, mostly for industrial and utility markets. From now on, however, Alberta will be the biggest source.

Local Happenings

Nels Peterson is a patient in the local hospital having suffered a severe heart attack this morning.

S. B. Card was a business visitor in Calgary last week. He was accompanied on his return trip by Mrs. Gray.

Mr. and Mrs. Bill Beckman and Mr. and Mrs. George Rasmussen of Lethbridge were dinner guests at the home of Mr. and Mrs. Alma Sommerfeldt on Sunday.

Mr. and Mrs. Malcolm Bridge of Magrath were week-end guests at the home of Mr. and Mrs. Ira McBride.

Joe Strong is a pneumonia patient in the local hospital.

The Bee Hive Girls of the First Ward held an outing at the Graham farm with their teacher, Mrs. Nona Bourne, as hostess.

Many people from here attended the funeral services of the late Marion Ackroyd in Magrath last Saturday.

Wednesday afternoon I thought for a while that I was to be the only man to attend the bazaar and pantry sale (with cats too of course) held in the Second Ward Recreation Hall but sponsored by the Third Ward Relief Society. 'Twas not so! Before we left, after eating a delicious "meal" and eyeing a lovely cake that had already been sold, Mr. Walton came in. Oh, happy day! I'm not a sissy after all. All you men who didn't go missed a good lunch and lots of feminine company. See you at the next one.

Mr. and Mrs. Phillip Hoot of Lethbridge were recent visitors at the home of Mr. and Mrs. Howard Rasmussen.

Friends will be sorry to learn of the death of Mrs. Ethel Hall of Taber, daughter of Mrs. Sarah Holmes. Mrs. Hall spent two winters here with her mother and during that time she became a member of the Athenaeum Club. She was also very active in church class discussions.

The condition of Tommy Roberts is improving steadily and Tan Ito is expected home shortly.

The birthday club held its monthly party at the home of Mrs. Amella Hartley with Mrs. Bertha Coppieters and Mrs. Hartley as honored guests each receiving a very nice gift.

A delicious lunch was served by the hostesses, Mrs. Cecil Winters and Leah Flexhaug.

The Wednesday Night Club met at the home of Mrs. Eva Ralph with ten members present. Rook was the main event of the evening with high score going to Mrs. Annie Larsen and consolation to Mrs. Thelma Turner.

Mr. and Mrs. N. Lorenzo Mitchell of Bountiful, Utah, are visiting in town. They came from Utah to attend the funeral services of Mrs. Hall who passed away recently in Taber.

Mr. Mitchell was a music teacher in this district many years ago.

Mr. and Mrs. T. Geo. Wood motored to Great Falls on Tuesday to bring back their daughter, Mrs. Rose Marie Slover and her son, Robbie. Mrs. Slover's husband is a major in the U.S. army and has been transferred to a summer camp so Mrs. Slover and Robbie will spend the summer here with Mr. and Mrs. Wood.
